DETAILED ACTION

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Application fails to have heading for the above sections in the specification.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/566,023 Page 3

Art Unit: 3612

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 3341855 to Geisler.

Re Claim 1, Geisler discloses a freight container having two access doors hingedly mounted at one end of the container via respective sets of hinges and mounting brackets which connect one edge of each door to a respective container door post; wherein at least one hinge and corresponding mounting bracket have co-operating receiving locations (13, 7) arranged to receive a customs seal (15 when the corresponding door is in a closed position (see Figure 2).

Re Claim 3, Geisler discloses a freight container wherein the hinge has an extended shoulder (6) arranged to contact the doorframe (1) when the container is exposed to twisting (racking) forces during transportation, in order to protect the customs seal (15) from damage during normal usage (see Figure 2).

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over by DE 3341855 to Geisler in view of US Pat # 5,931,033 to Lanigan et al.

Geisler fails to disclose the freightliner container wherein one of the doors has an overlap with the other door, when both doors are in the closed position.

Application/Control Number: 10/566,023

Art Unit: 3612

Lanigan et al teaches the freightliner container wherein one of the doors has an overlap (See Figure 10) with the other door, when both doors are in the closed position.

It would have been obvious to one with ordinary skill in the art to have the overlapping doors as taught by Lanigan et al on the device of Geisler in order to further stop illegal entry into the freightliner.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over DE 3341855 to Geisler in view of US Pat # 6,406,074 to Mahaney.

Geisler fails to disclose a freight container wherein by provision of a frangible customs seal receivable by said receiving locations when the doors are in the closed position.

Mahaney teaches a frangible customs seal (See Figure 3) receivable by said receiving locations.

It would have been obvious to one with ordinary skill in the art at the time the invention was made to include the frangible customs seal as taught by Mahaney on the device of Geisler in order to detect the illegal entry when the hinge and bracket move disassembling the customs seal (Abstract).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melissa A. Black whose telephone number is (571) 272-4737. The examiner can normally be reached on M-F 8:30-5:00 ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Dayoan can be reached on (571) 272-6659. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
